

Everything for Oil Transformers

The insulating system is the deciding factor in the reliability performance and service life of oil transformers. For such fundamental problems in electrical engineering, the KREMPEL-GROUP offers a variety of insulation materials all from one source.

Layer and winding insulation:

PSP 3055 RPT (P.2.1B) - Presspaper

PREPREG CTBD

Presspaper with epoxy resin coating

KREMPEL-DPP

Diamond dotted presspaper

Insulation cylinders and cooling channels, support etc.:

PSP 3050 (B.2.1B) - Pressboard

POWERBOARD AK (B.3.1A) - Pressboard

KREMPEL corrugated board

Ladder duct made of presspaper and pressboard

Ladder grid made of presspaper and pressboard

Outer bandings:

PREPREG EFB

Thread-reinforced polyester non-woven with epoxy resin impregnation

Insulations for coil connections:

Crepe paper tubes
